

Block and Tackle

Written by

In the fall of 2010, Rural Route Communications completed a video titled *Block and Tackle: A Traditional Timber-Frame Raising* for Hamlet Heavy Timberwork about the erection of a timber frame for a sugar cabin on a beautiful farm outside of Georgeville. Because of the project's location in the woods, the crew had to transport all the construction material by tractor and had to raise the structure using block and tackle.

You can see the block and tackle video on [YouTube](#) .
